

## Revised Certification Scope – Issuance of New Certificate and Certification Mark

Date: 6<sup>th</sup> July 2026

To: Tiina Linjama

Company: Finnish Stem Cell Registry

Certificate No.: 1223/9738

### Re: Revised Certification Scope and Mandatory Transition to New Certificate and Certification Mark

Dear Tiina Linjama,

Following your request and the successful completion of the certification review process (through major change notification), the scope of your certified activities has been formally reduced. As a result, we have issued a new certificate reflecting the revised scope of certification.

Please find enclosed:

- The revised Certificate of Conformity;
- The updated certification mark/logo authorized for use in connection with the revised certification scope; and
- Reference to the applicable procedure governing the use of the certification mark.

In accordance with our certification requirements and the Procedure for the Use of the Certification Mark, your organization is required to ensure that all references to certification accurately reflect the current certified scope.

#### Required Actions

You are requested to:

1. Immediately discontinue the use of the previous certificate and certification mark where practicable.
2. Replace all existing references to the former certification scope with the revised certificate and certification mark.
3. Update, as applicable, websites, marketing materials, catalogues and any public references to certification.

### Transition Period

A maximum period of six (6) months from the date of this letter is granted for implementation of these changes.

After this date, the previous certificate and logo will no longer be authorized for use and any continued use may be treated as misuse of certification.

### Continued Compliance

Your organization remains responsible for ensuring that all certification claims accurately reflect the revised certified scope.

Yours sincerely,

Sunethra Trouw Gunasekara  
Certification Coordinator
